

Am I carrying the virus of AIDS or Hepatitis B or C ,

A compartment marked is enough to think of making you detect.....

- I was transfused before 1992
- I ever tried drugs (even one time, even long time ago) by sniff or injection
- My mother had AIDS or Hepatitis B or C
- I had chirurgical intervention or I've got a disease exposing to transfusions
- I've got or I had unprotected sexual intercourse without control my serology
- I had problem with condom during a sexual intercourse
- One of my close relation has AIDS or Hepatitis B or C
- I had important medical examination (endoscopy, biopsy) before 1997
- I was in jail at a moment in my life
- I was done a tatoo or a piercing in bad condition of hygiene
- I was born or I lived in a country where AIDS or Hepatitis B or C are frequent (Asia, Africa, Central America, Eastern country...)
- I'm in a category of professionnall who are exposed
- I'd like to know my serology simply

Please note : Am I inoculated against the Hepatitis B ?
